CLTAF Training Course & Curriculum Updates

CLTAF Scaffold Builders Courses and Scaffold "Test Out"

Effective October 1st, 2015

CLTAF's Current 2-Day Scaffold Builders Course will no longer be offered. A 5-Day Scaffold Technology Course will now be available.

LIUNA Training has redesigned the Scaffold Builders Course and has standardized this training on a national level for all LIUNA Training Funds to implement. This Scaffold Technology Course is recognized by International Accreditation Services (IAS) and will be 5 days (40 Hours). This Training Certificate will expire in 4 years and participants will need to take our 1-Day Scaffold Refresher to renew their certificate. There will be a 1-year grace period extended for you to renew your certification.

This new 5-day training will include the following Scaffold Systems:

- Scaffold User Safety – OSHA Subpart L
- Scaffold Tools and P.P.E.
- Building Frame Scaffolds
- Building Tube and Clamp Scaffolds
- Building Systems Scaffold
- Building Suspension Scaffolds

Our current 2-day Scaffold Builders Course includes the following:

- Scaffold User Safety – OSHA Subpart L
- Scaffold Tools and P.P.E.
- Building Frame Scaffolds

If participants need Tube and Clamp (1-Day), System (1-Day) and/or Suspension Scaffolding (2-Days), they would need to schedule a class for each scaffold system needed.

Effective October 1st, 2015

CLTAF Scaffold "Test Out" will be updated, restructured and renamed to "Scaffold Refresher"

Laborers that have attended training at the CLTAF will be eligible to take this 1-day Refresher.

This Refresher course will be required every 4 years.
